# Michael Eccles - Web Developer
Orlando, Florida | Open To Telecommute
www.mikeeccles.net - mnboyaz@msn.com - 520.870.1152

## Summary:

Web developer & QA engineer with emphasis on Javascript and PHP stacks. Currently seeking an interesting technology company who embraces new and energetic developers ready to fit into any team. I am open to a variety of roles, including QA testing and web development.

## Developer Technologies

- Node JS, NPM
- Express, Apache 2
- MySQL, NoSQL
- Service Oriented Architecture
- JQuery, Angular, Bootstrap, AJAX
- PHP, LAMP
- CSS2, CSS3, HTML5
- Linux, Mobile Web
- Handlebars, Chai, Karma
- Cloud Infrastructure
- Amazon Web Services
- EC2 (Classic and VPC)
- Route 52 DNS Management

- Mocha, Request, xUnit
- Object Oriented Programming
- Restful API Design
- Client-Side Javascript
- Test-Driven Development
- Github Integration, etc.
- LESS, Grunt
- Symfony2, CakePHP, WAMP
- Notepad++
- Node Package Manager
- PRIV/DMZ Familiarity
- MySQL Setup, Command Line

## Process, Preferences, and Management

- Agile Methodologies
- Kanban Work In Progress
- Scrum Team SDLC

- Automated Testing
- MVC Frameworks

## Experience

Goodfellaz Internet Services - Web / API Developer (2012 – 2015)

Learned and participated in ongoing software development life cycles. Was responsible for writing unit tests for Node and PHP applications, peer-reviewed code by senior developers to facilitate learning, and eventually participated in writing API services which were consumed by static applications and mobile clients.

Worked extensively with restful API design and JSON data exchange. Most database work was done in MySQL, with small amount of time in MongoDB.

Crocagile.com - Web Developer / QA Engineer (Late 2014 – Early 2015)

Participated mostly as QA engineer, testing all aspects of the Crocagile service. Heavy emphasis on manual testing of user behavior and expected results. Attempted to break services with invalid input, and reported issues to the Crocagile ticket tracking system.

As a result, I also became familiar with using online project management software.
